Speed up your Workflow with Bookmarks

Easily get to any folder with 2 taps:

- Tap the  Bookmarks Icon in any folder.
- Tap “+” and name your Bookmark.

You can also Bookmark your page in PDFs and other documents.

Create a PDF from an Image

- Tap the menu for an image.
- Tap “Create PDF File”.

The new PDF will be saved to the current folder.

Advanced Bulk Rename Tools

Find and replace text strings,
add dates or even add a
counter to hundreds of filenames.

Show Me

Play Audio and Video with FileBrowser

FileBrowser's built in player supports all iOS compatible formats.

- For other formats like MKV and AVI, select Stream to Another App from the menu.
- You can make this the default when you tap a video file.

Read PDFs and ePub Files

Bookmark your reading position in a PDF or ePub file. When viewing ePub files you can change your viewing options and font size for easier readability.

Show Me

Set Safari's Download Location to FileBrowser

- Open iOS settings and select Safari.
- Tap Downloads to change its location.
- Select Other, then select On My iPhone/iPad from the list.
- Select FileBrowser, then tap Done.

Now any downloads from Safari will be automatically saved to the "On My iPhone/iPad > FileBrowser" folder.

Siri reminders with FileBrowser

Set a Siri Voice Shortcut to jump to a folder:

- Tap the context menu for a file or folder.
- Select Add Voice Shortcut.

Or navigate to a folder and ask Siri to remind you about this later at a time or at a location. Siri's reminder link will open the folder you were in.

Export books into the Amazon Kindle App

Tap the menu button for a .mobi or .epub and choose Share, scroll the list of apps to the left and select the "Kindle" app.

Split Screen + Drag Drop Tabs

On iPad, drag a tab or a folder to the screen edge to create a split screen. You can also drag to rearrange your tabs.

Export FileBrowser Settings

Export your locations and other settings to another iPad or iPhone:

- Tap the  on the home screen.
- Select "Admin Settings".
- Scroll to the bottom of the list and tap "Save".

A new file called "Settings.FILEBROWSER" has now been added to your My Private Files location. Share this file to another device and open it in FileBrowser.

View our Full User Guide Online

FileBrowser has so many features for you to share, edit and organise your files. See our user guide to find features to speed up your workflow.

Backup your Photos with Backup Tasks

Backup the Photos on your iPhone or iPad without iCloud. Tap the menu for the Camera Roll folder, select "Create Backup Task" and then choose a destination location for the photos, either your computer or cloud storage.

Show Me

Extra Security with SMB3

FileBrowser Professional uses the latest and most secure version of SMB.

XMP Photo Rating

Select your NEF or JPG files and rate them using XMP. You can also sort photos by rating.

Sync Folders to your Device

Sync Folders from any location to your iPad or iPhone. Simply tap a folder's menu and select "Create Sync Task". You can find the Synced Files under the "Sync Files" location on the home screen.

Create Multi-page PDFs from Images

- Select several images.
- Tap "Create PDF File" from the actions menu.

The new PDF will be saved to the current folder.

MDM Setup

Roll out custom settings for servers and clouds using your Mobile Device Management solution. Users can have instant file access with no setup.

Safe Customer Kiosk Mode

Use iPads on the shop floor or at conventions for presenting portfolios, brochures or video. Content can be on a server or synced for offline access. Ensure that users have a simple to use read-only version of your files.
