

Let's get started

Use our setup wizard to connect to your Computers, Network Drives, Servers or all of your cloud storage. Simply tap the “Add Location” button or the plus icon on the FileBrowser Professional home screen.

If you are having trouble connecting to your computer, see one of our guides below:

Mac

Remote File Access (VPN)

For business or corporate environments a VPN is usually available and FileBrowser Professional fully supports this, whether you are using a system-wide iOS VPN client or a per-app VPN configured and deployed by your MDM system.

For personal or home use, access your documents over WiFi or cellular (mobile data) using ZeroTier and FileBrowser Professional. ZeroTier's VPN solution is simple, secure and easy to setup.

Bookmark Files or Folders

Bookmarks are a shortcut to either a folder, a document or a page within a PDF or ePub file, allowing you to return to a location with a single tap.

- Tap the  Bookmarks Icon in any folder.
- Tap “Add” and name your Bookmark.

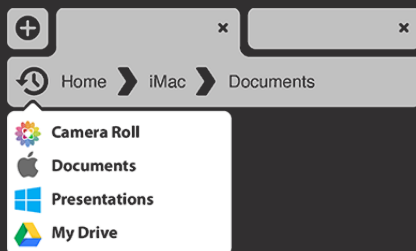

Show Me

History

FileBrowser automatically remembers the most recently visited files and folders, and with a single tap you can re-open a file or rapidly browse to a folder.

Tap the History icon in the breadcrumb bar to display the files and folders that you have recently interacted with.

Merge PDFs

Merge multiple PDFs into a single document.

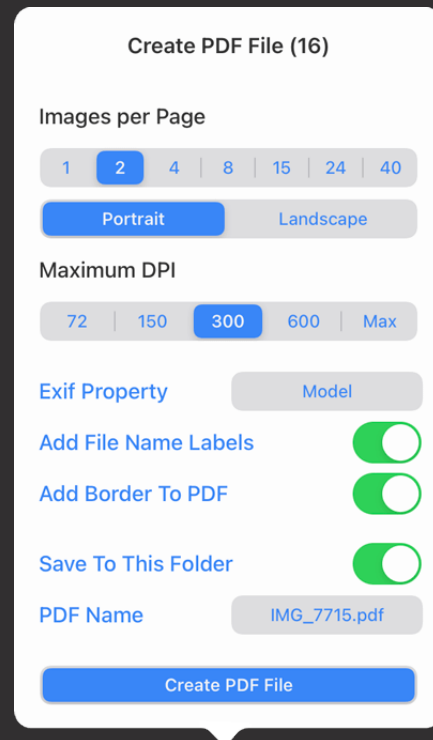

- Select multiple PDFs in a folder and then tap the menu icon (bottom left). Select “Create PDF File”.
- Tap “Create PDF File” and the new PDF will be saved into the current folder. You can save the PDF to another location by unchecking “Save to this Folder” and the file will be copied to your clipboard.

Tip: If you change the sort order the files will be added in order from top to bottom in the file view.

Create Multi-page PDFs from Images

- Select several images.
- Tap “Create PDF File” from the actions menu.

Choose your options and tap “Create PDF File”.

Play Video Files

FileBrowser Professional’s built in player supports all iOS compatible formats.

For other formats like MKV and AVI, select Stream to Another App from the file menu.

Chromecast & AirPlay

Cast your movie, music and photos files to AirPlay or Chromecast devices.

Search

Browse to a folder you want to search and tap the search icon on the bottom toolbar.

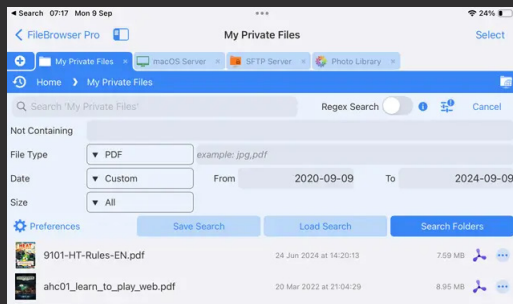

You can also use the ‘not Containing’ box to hone your searches further.

Tap the enter key on the keyboard and you will be asked if you want to search this folder only or all of its sub folders.

Advanced Search

Search custom date ranges, file types or using Regex, tap the setting icon in the search bar. You can save and load searches too.

Show Me

Live Searching

To enable live searching while typing: tap the Search icon then expand the options by tapping the settings icon in the search bar, tap the “Preferences” button and enable “Search While Typing”.

Advanced Bulk Rename

Find and replace text strings, add dates or even add a counter to hundreds of filenames.

Add Text

Insert text before or after filenames in bulk.

Find and Replace

Replace text in filenames in bulk.

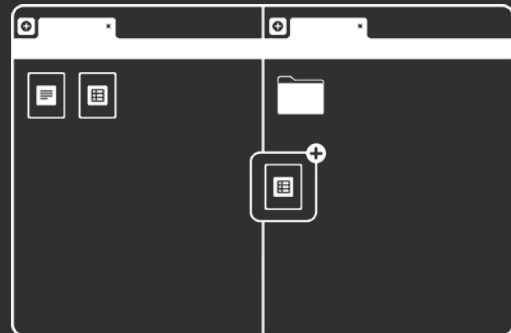

Format

Add Indexes, Counters, or EXIF values or dates in any date format to your filenames.

Show Me

Split Screen + Drag Drop Tabs

Drag a tab or a folder to the screen edge to create a split screen. You can also drag to rearrange your tabs.

Rate Photos

Select a NEF or JPG photo file and rate it using XMP. You can also sort your photos by rating value.

Sync Folders to your iOS Device

Sync Folders from any location to your iPad or iPhone. Simply tap a folder’s menu and select “Create Sync Task”. You can find the Synced Files under the “Sync Files” location on the home screen.

Create Backup Tasks

Backup files and folders from any location to another. Tap the menu inside a folder and select “Create Backup Task” and then choose a destination location such as your computer or a cloud storage account.

Backup your Photos with Backup Tasks

Backup Photos on your iPhone or iPad without iCloud with a Backup Task.

Show Me

Custom Tasks

Use our powerful custom task builder to create file tasks such as:

- Monitor Remote Folder for new PDF documents in the last seven days and download to my iPad or iPhone.
- Automatically monitor a remote folder for file names with a keyword and download matching documents to your iPad or iPhone.
- Automatically Backup your iPhone or iPad Camera roll to two locations your computer and Google Drive for example.

Use our task builder to create your own custom tasks for advanced bulk renaming, moving, copying, advanced backup and sync operations. Scheduled these tasks or run them manually.

Show Me

Siri Reminders to Navigate Folders

Set a Siri Voice Shortcut to jump to a folder:

- Tap the context menu for a file or folder.
- Select Add Voice Shortcut.

Or navigate to a folder and ask Siri to remind you about this later at a time or at a location. Siri's reminder link will open the folder you were in.

Set Safari's Download Location to FileBrowser

- Open iOS settings and tap "Apps" then Safari.
- Tap Downloads to change its location.
- Select Other, then select On My iPhone/iPad from the list.
- Select FileBrowser Professional, then tap Done.

Now any downloads from Safari will be automatically saved to FileBrowser Professional's "On My iPhone / iPad" location.

Export Settings

Export your locations, settings and passwords to another iPad or iPhone:

- Tap the  on the home screen.
- Select "Admin Settings".
- Scroll to the bottom of the list and tap "Save".

A new file called "Settings. FILEBROWSER" has now been added to your "My Private Files" location. Share this file to another device and open it in FileBrowser. Note: your cloud storage accounts will need re-linking.

View our Full User Guide Online

FileBrowser Professional has so many features for you to share, edit and organise your files. See our user guide to find features to speed up your workflow.
