

Welcome to Markup!

Here are some tips for you to get started with your reading. You can also visit: <https://support.kdanmobile.com/hc/en-us> to play around

How to Import Files from Cloud Storage (Dropbox, Google Drive)

Method 1: "More" Tab

1. Go to "More" and you will see the option to import from Dropbox or Google Drive.

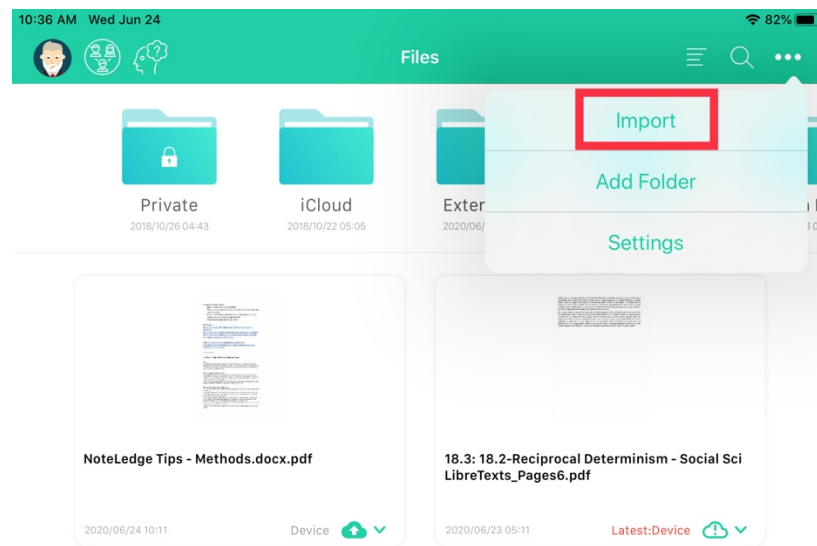

2. To log into your accounts, tap on your chosen cloud storage and log in.

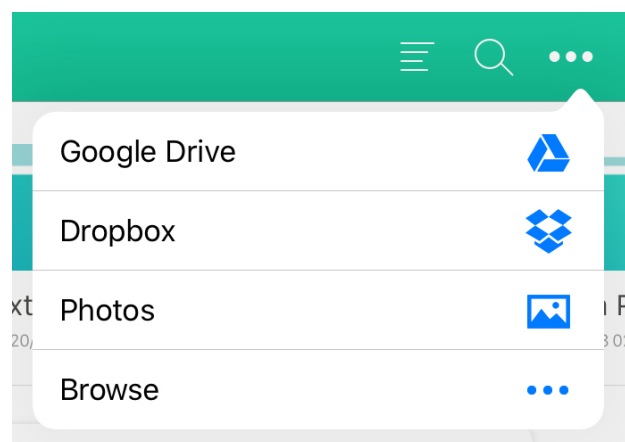

3. After successful login, your Dropbox or Drive account should appear, allowing you to choose a file or document to import.
4. Your files will be saved in the "Downloads" folder in the "Files" tab.

Method 2: Import

1. Go to the "Files" tab.
2. Tap the three dots in the upper right corner, then tap "Import."

3. Tap Google Drive or Dropbox to browse for files.

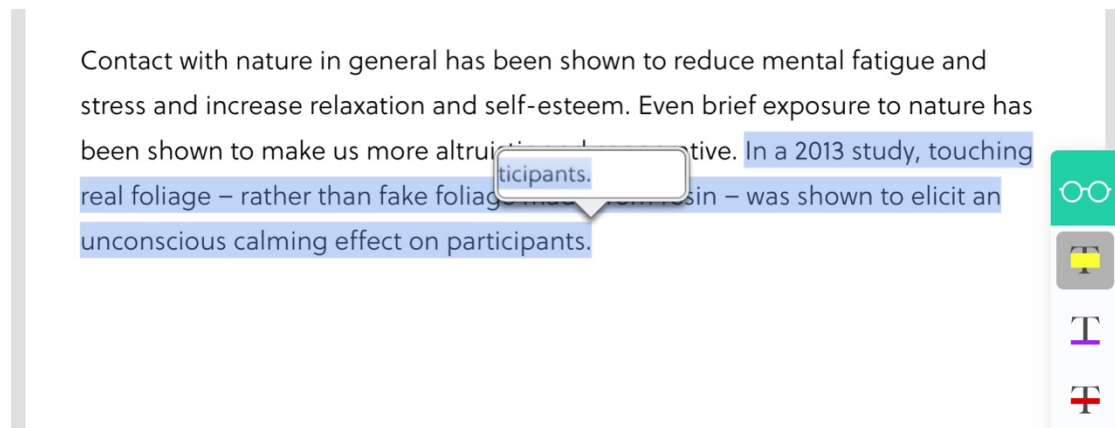

4. After you're done importing, your files will show up in the "Downloads" file.

How to Highlight, Underline, and Strikethrough

1. Go to the page where you want to make an annotation.
2. From the annotation toolbar on the right-hand side, select the annotation style you want to apply to a section of text. You will enter the annotation mode.

3. You can drag your finger to mark the text you want to include.

4. The text you select will be annotated immediately. Tap the annotation icon again to exit annotation mode.

5. To change the color, opacity, copy, share, add a note, or delete the annotation, simply tap the annotation and choose your action from the popup menu.

How to Remove Annotations from PDFs

1. Turn off the annotation tool you are currently using.
2. Tap on the particular annotation you would like to remove.
3. You will then see a menu bar; tap "Delete" to remove the annotation from the PDF.

making 3.3x more money per app than Symbian developers followed by Java ME (2.7x) and BlackBerry (2.1x). The Android platform is the most popular, with 3.3x more apps than Symbian.

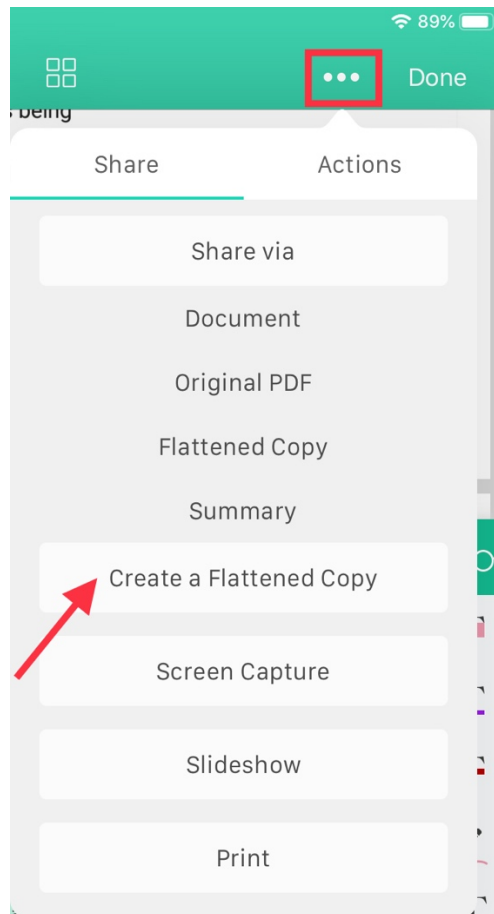

Role of operators. Traditionally, application developers have been cold and uncertain as to the role the operators can play in a software world. While the majority of developers agree that the role of operators is to deliver data access (61%) and voice

How to Create a Flattened Copy of a PDF

If you want to share your edited or signed PDF file with others, make sure you share the **"flattened copy"**. Flattened copies will save all your highlights, annotations, and signatures, and make all content unchangeable. So you can share your files freely without worrying it will be altered!

1. Open a PDF file.
2. Tap the  icon on the top right and you will see a drop-down menu.
3. Select "Create a Flattened Copy" under "Share" to enable the flatten process automatically.

4. The flattened copy will be saved to the files management pages or in the folder your original file is in.

△ Attention: Please notice that the annotations in the flattened copy can no longer be edited or moved. This is designed to protect your important information, such as digital signatures.
