

Thanks for purchasing my plugin!

This is the default.pdf in your xcode project located at:

/BT_Plugins/BTM_ReaderDemoController/default.pdf

Replace it with your own PDF named default.pdf. If you want to change the name, you can, and then update the name in the Control Panel for it to work again. If it can't find the PDF file, *the app may crash.*

Thanks again! Need support? Go to:
