Color Correction

Shows which filters are required to "correct" light sources for either Tungsten or Daylight.

Select type, either **3200K - Tungsten** or **5500K – Daylight** buttons.

Select **Light Source** by either entering an exact Kelvin Temperature in the box or choosing a Generic one from the picker button.

The result will be the Stop Loss, Correction Filters Required and the Total required Mired.

As a visual aid a tinted filter icon or icons will pop up showing which filters are needed.

Entering an exact Kelvin Temperature in the box overrides what is picked on the generic picker as the picker sometimes has ranges of temperatures. Use keyboard +/- buttons to quickly change values.

Notes:
The filter icons are an approximation of the actual filter's color.

Since filters, light sources and color-temperature meters vary; film tests should be used to verify results.

Notes for all tools:

Favorite Category and Widgets
Add tools to the Favorite List by swiping left to right on a tool in the list within pCAM app.

Your favorite tools will appear in the Favorite Category within pCAM, and also on Widgets on your device's Home Screen.

1) Perform a long press on the pCAM icon and your Favorite Tool List pops up.

2) Choose the small icon to display 4 of your Favorite tools. Choose large icon to display 8 of your Favorite tools.

3) On your device's Today View (swipe right on Home screen), and add a pCAM Widget to contain either 4 or 8 of your Favorite tools.

Tips for using pCAM Pro on Silicon Macs:

To Download:
Must be a Silicon Mac.
Go to the App Store on your Mac. Do a search entering "pCAM Pro," then click on "iPhone & iPad Apps." Download into your Mac's Applications folder.

To Best simulate iPad:
1) Change pCAM Pro/Preferences on the Silicon Mac's top menubar.
General - Change window size to either Smaller or Larger (default).
Touch Alternatives - Turn ON.
- Enables Muti-Touch for swiping and tapping.
- Drag enables your trackpad to pinch within Field of View Preview.

2) Rotate the app from Portrait to Landscape via the Mac's menubar "View." Can also be rotated by single clicking on a corner of the app and dragging to shrink or enlarge.

3) When entering a unit value in one of pCAM's tools (i.e. Focal Length or Distance) an overlay will appear on the right side of pCAM Pro's screen for Units, inches and feet, +/-, jumping between fields, etc.
