Eye Light & Chroma Key

For run and gun close-up photography, an eye-light (catch-light), tabletop photography, miniature soft-box, or turn device display green or blue screen. Can also be used on an HDTV television with AppleTV and AirPlay to turn large display green or blue screen (including tracking markers).

Note: For best results turn device's brightness to its highest setting.

Colors can be saved via Save button, lower left. Colors can be organized or deleted by tapping the bottom file icon. Saved colors can be renamed via bottom paper icon.

Hide the controls and activate via the 4-arrow button on the bottom right. Touching background color also toggles.

Color Temperature
Top slider adjusts **Color Temperature** in Kelvin.

Middle slider adjusts from **Magenta** to **Green**.
Bottom slider adjusts **Brightness**.

Note: The 3 Color Temp presets are just an estimation of color temperature. Each device, screen, screen protector, and brightness level, is different. Use a color temp meter or video monitor to verify results.

Spectrum
Top slider adjusts **Hue**.
Middle slider adjusts **Saturation**.
Bottom slider adjusts **Brightness**.

VFX Tracking
After creating a background in Spectrum, add tracking elements to corners and center. Set the color of the Tracking Markers the same as Spectrum. Note: The stars do not change color, only black and white.

Notes for all tools:

Favorite Category and Widgets

Add tools to the Favorite List by swiping left to right on a tool in the list within pCAM app.

Your favorite tools will appear in the Favorite Category within pCAM, and also on Widgets on your device's Home Screen.

1) Perform a long press on the pCAM icon and your Favorite Tool List pops up.

2) Choose the small icon to display 4 of your Favorite tools. Choose large icon to display 8 of your Favorite tools.

3) On your device's Today View (swipe right on Home screen), and add a pCAM Widget to contain either 4 or 8 of your Favorite tools.

Tips for using pCAM Pro on Silicon Macs:

To Download:

Must be a Silicon Mac.

Go to the App Store on your Mac. Do a search entering “pCAM Pro,” then click on "iPhone & iPad Apps.” Download into your Mac’s Applications folder.

To Best simulate iPad:

1) Change pCAM Pro/Preferences on the Silicon Mac’s top menubar.

General - Change window size to either Smaller or Larger (default).

Touch Alternatives - Turn ON.

- Enables Muti-Touch for swiping and tapping.
- Drag enables your trackpad to pinch within Field of View Preview.

2) Rotate the app from Portrait to Landscape via the Mac’s menubar “View.” Can also be rotated by single clicking on a corner of the app and dragging to shrink or enlarge.

3) When entering a unit value in one of pCAM’s tools (i.e. Focal Length or Distance) an overlay will appear on the right side of pCAM Pro’s screen for Units, inches and feet, +/-, jumping between fields, etc.
