Mired Shift - Gel Selector

Calculates the Mired Shift of two Kelvin temperature values. Enter **Original** source **Kelvin** temperature in its box and **Desired Kelvin** temperature in its box. The resulting **Mired Shift Result** is automatically calculated.

In addition, it shows which gels are suggested to "correct" the light sources from Original source Kelvin value to the Desired Kelvin value.

Select gel manufacturer by touching either **Rosco**, **Lee**, **GAM**, or **Formatt** at the top.

The result will be the manufacturer's gel number, its name and mired value, Color Temperature Orange or Blue.

Choices given of various gels or combination of gels to match the Mired Shift. To the right of each suggested gel is its Mired Value or Total Mired Value if it's 2 gels combined.

Underneath the suggested gel box is a switch for **Include Straw** or **No Straw** depending on preference.

Notes: The gel icons are just an approximation of the actual gel's color. Since gels, light sources and color-temperature meters vary, film tests should be used to verify results.

Notes for all tools:

Use the keyboard +/- buttons for quick changes, and the arrow buttons to jump to the next field.

Favorite Category and Widgets
Add tools to the Favorite List by swiping left to right on a tool in the list within pCAM app.

Your favorite tools will appear in the Favorite Category within pCAM, and also on Widgets on your device's Home Screen.

1) Perform a long press on the pCAM icon and your Favorite Tool List pops up.

2) Choose the small icon to display 4 of your Favorite tools. Choose large icon to display 8 of your Favorite tools.

3) On your device's Today View (swipe right on Home screen), and add a pCAM Widget to contain either 4 or 8 of your Favorite tools.

Tips for using pCAM Pro on Silicon Macs:

To Download:
Must be a Silicon Mac.
Go to the App Store on your Mac. Do a search entering "pCAM Pro," then click on "iPhone & iPad Apps." Download into your Mac's Applications folder.

To Best simulate iPad:
1) Change pCAM Pro/Preferences on the Silicon Mac's top menubar.
General - Change window size to either Smaller or Larger (default).

Touch Alternatives - Turn ON.
- Enables Muti-Touch for swiping and tapping.
- Drag enables your trackpad to pinch within Field of View Preview.

2) Rotate the app from Portrait to Landscape via the Mac's menubar "View." Can also be rotated by single clicking on a corner of the app and dragging to shrink or enlarge.

3) When entering a unit value in one of pCAM's tools (i.e. Focal Length or Distance) an overlay will appear on the right side of pCAM Pro's screen for Units, inches and feet, +/-, jumping between fields, etc.
