Relative Size

Compares one camera format size (digital sensor or film aperture) to another. It compares the true physical size of the formats (not the number of pixels).

Choose Original Format **(Format 1)**. Then the format to compare **(Format 2)**.

NOTES:
The frame lines resize each time a new format is picked, so its function is to compare only the two formats on the screen, and not for comparing to previous or subsequent selections.

The background image is just for reference, and should not be considered as correct framing and size. The calculation for framing and precise image size is the Field of View Preview tool.

Custom Speed Booster® Adapter cameras chosen on this tool will display the camera's actual sensor size (not as an "enlarged" sensor). Speed Booster®

Adapters do not increase sensor size, they reduce the focal length.

URL scheme: pcampro://RelativeSize

Notes for all tools:

Camera Formats
Updated automatically from a server. See “Cameras Updated” in Settings for date and time.

Add cameras to Favorite list by swiping left to right on a camera in the list.

Create a custom format: In Camera Formats pick any camera to use as a template, then the **Manage** button on top right. In Manage Custom Formats touch the **+** button on top right. In Create Custom Format change any of fields and Save: Name – Category (Film, Video or Still) – Horizontal and Vertical – Circle of Confusion.

Camera Formats are linked in Focal Length Match and Relative Size. Changes to one also change in the other.

Favorite Category and Widgets

Add tools to the Favorite List by swiping left to right on a tool in the list within pCAM app.

Your favorite tools will appear in the Favorite Category within pCAM, and also on Widgets on your device's Home Screen.

1) Perform a long press on the pCAM icon and your Favorite Tool List pops up.

2) Choose the small icon to display 4 of your Favorite tools. Choose large icon to display 8 of your Favorite tools.

3) On your device's Today View (swipe right on Home screen), and add a pCAM Widget to contain either 4 or 8 of your Favorite tools.

Tips for using pCAM Pro on Silicon Macs:

To Download:
Must be a Silicon Mac.
Go to the App Store on your Mac. Do a search entering "pCAM Pro," then click on "iPhone & iPad Apps." Download into your Mac's Applications folder.

To Best simulate iPad:

1) Change pCAM Pro/Preferences on the Silicon Mac's top menubar.

General - Change window size to either Smaller or Larger (default).

Touch Alternatives - Turn ON.

- Enables Muti-Touch for swiping and tapping.
- Drag enables your trackpad to pinch within Field of View Preview.

2) Rotate the app from Portrait to Landscape via the Mac's menubar "View." Can also be rotated by single clicking on a corner of the app and dragging to shrink or enlarge.

3) When entering a unit value in one of pCAM's tools (i.e. Focal Length or Distance) an overlay will appear on the right side of pCAM Pro's screen for Units, inches and feet, +/-, jumping between fields, etc.
