Shooting Time/Screen Time

 button clears previous entries.

Reset does not reset camera or projector speeds, these are done manually.

Enter the Camera Speed.

(Usually Projector speed remains at 24 fps and Camera Speed is set for lower or higher than 24 fps).

Choose **Screen Time** underneath **Calculate** to calculate the **Screen Time** based on the entered **Shooting Time**, usually at a higher or lower camera frame rate than the projector.

Choose **Shooting Time** underneath **Calculate** to calculate how long **Shooting Time** should be for an entered **Screen Time**.

Choose **Camera Speed** underneath **Calculate** to calculate how fast or slow a **Camera Speed** should be at an entered **Shooting Time** and **Screen Time**.

Notes for all tools:

Use the keyboard +/- buttons for quick changes, and the arrow buttons to jump to the next field.

Favorite Category and Widgets
Add tools to the Favorite List by swiping left to right on a tool in the list within pCAM app.

Your favorite tools will appear in the Favorite Category within pCAM, and also on Widgets on your device's Home Screen.

1) Perform a long press on the pCAM icon and your Favorite Tool List pops up.

2) Choose the small icon to display 4 of your Favorite tools. Choose large icon to display 8 of your Favorite tools.

3) On your device's Today View (swipe right on Home screen), and add a pCAM Widget to contain either 4 or 8 of your Favorite tools.

Tips for using pCAM Pro on Silicon Macs:

To Download:
Must be a Silicon Mac.
Go to the App Store on your Mac. Do a search entering "pCAM Pro," then click on "iPhone & iPad Apps." Download into your Mac's Applications folder.

To Best simulate iPad:
1) Change pCAM Pro/Preferences on the Silicon Mac's top menubar.
General - Change window size to either Smaller or Larger (default).
Touch Alternatives - Turn ON.
- Enables Muti-Touch for swiping and tapping.
- Drag enables your trackpad to pinch within Field of View Preview.

2) Rotate the app from Portrait to Landscape via the Mac's menubar "View." Can also be rotated by single clicking on a corner of the app and dragging to shrink or enlarge.

3) When entering a unit value in one of pCAM's tools (i.e. Focal Length or Distance) an overlay will appear on the right side of pCAM Pro's screen for Units, inches and feet, +/-, jumping between fields, etc.
