QuickPDF is the new breed of PDF apps and takes advantage of the new extensions capability in iOS 8. With QuickPDF you can PDF webpages, files, documents, photos and lots more completely from within any app.

- ✓ Use the action button to PDF directly from within Safari, Email attachments and any other app that supports “Open in...”
- ✓ PDF virtually all types of files and documents
- ✓ And much much more, [tap here](#) for the full step by step guide to all the features contained within QuickPDF

1) Add QuickPDF as an option to PDF from Safari (use this for other apps too)

Because QuickPDF uses the new extensions in iOS 8, you will be able to have QuickPDF as an option in Safari, mail attachments and any other app that uses “Open in...” Follow the steps below to add QuickPDF as an action option in Safari.

- 1) Open Safari and tap on the action  button
- 2) On the second line of icons, scroll to the right and you will see a “More” button
- 3) Tap on “More” and then you will be able to enable QuickPDF using the toggle button on the right.
- 4) You can move QuickPDF up and down the view order but using the drag and move bars on the right.

2) Convert documents, spreadsheets, email, webpages and more to PDF

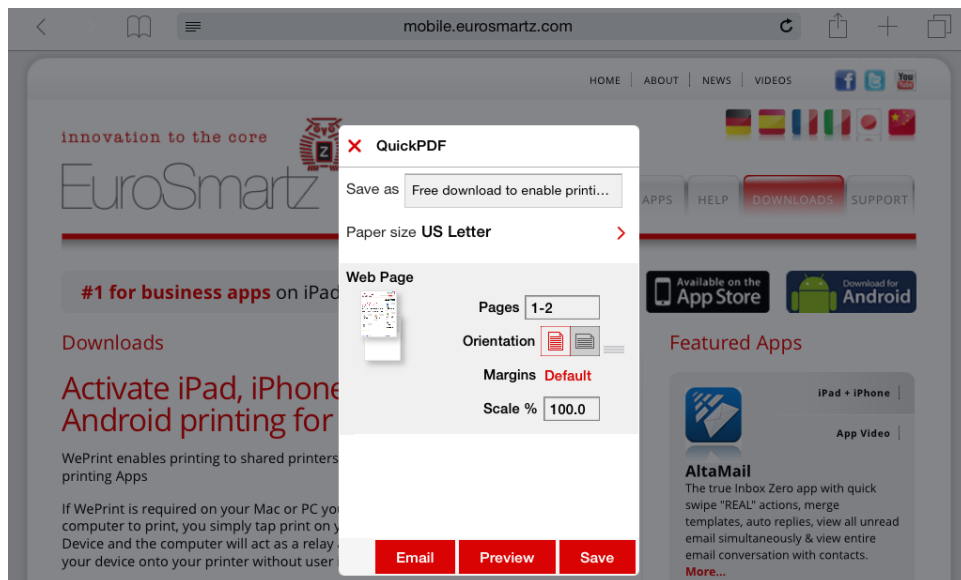

QuickPDF has a full and very sophisticated PDF conversion engine that will enable you to convert documents and files to PDF. You can also convert web pages, contacts, email, pictures and much more to PDF.

To convert documents or files to a PDF from within another apps, setup QuickPDF in the other app you wish to use as described above. Once set up you can tap the  Action button in an app and choose Quick PDF.

You can also convert a file or document to a PDF from within QuickPDF (including from the Cloud). To do this simply check the box beside the document or file you wish to convert and then tap the PDF button.

You can convert file types

- ✓ Microsoft Word, Excel & PowerPoint
- ✓ iWork Pages, Numbers & Keynote
- ✓ PDFs
- ✓ Email & attachments
- ✓ Image files
- ✓ Text files
- ✓ html/web pages
- ✓ and many more

3) Setting up Cloud Services

You can set up all your favorite Cloud services quickly and easily in QuickPDF. To add a Cloud service simply tap on the Cloud Icon with a + on it in the left sidebar and choose the service you wish to add. Once you have a Cloud service added you can then convert any document or file to a PDF from the cloud just by selecting it and tapping the PDF button – no need to download it first.

4) How to contact us if you need further help

QuickPDF comes fully backed with our 24/7 email support. Our average response time is 1 hour and often you will get a response within just 30 minutes.
