Scriptation

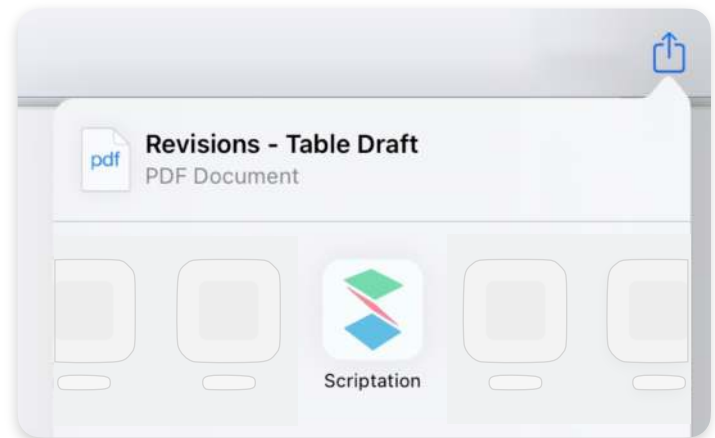

iCloud Quick Start Guide

Importing files into iCloud

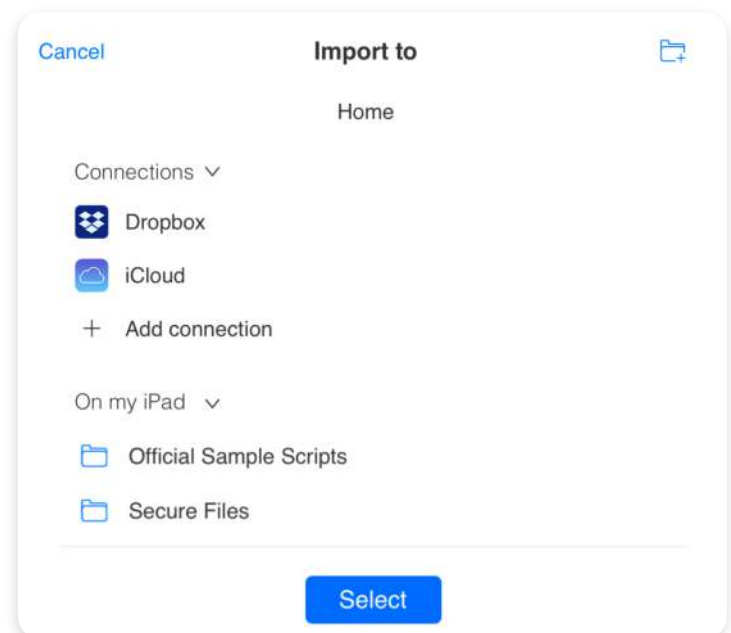

Files can flow into iCloud from many sources, but the most common is via email attachment.

- 1 Open the PDF
- 2 Tap **Share** 
- 3 Select **Scriptation**

Tip: Don't see Scriptation? Swipe right and tap 

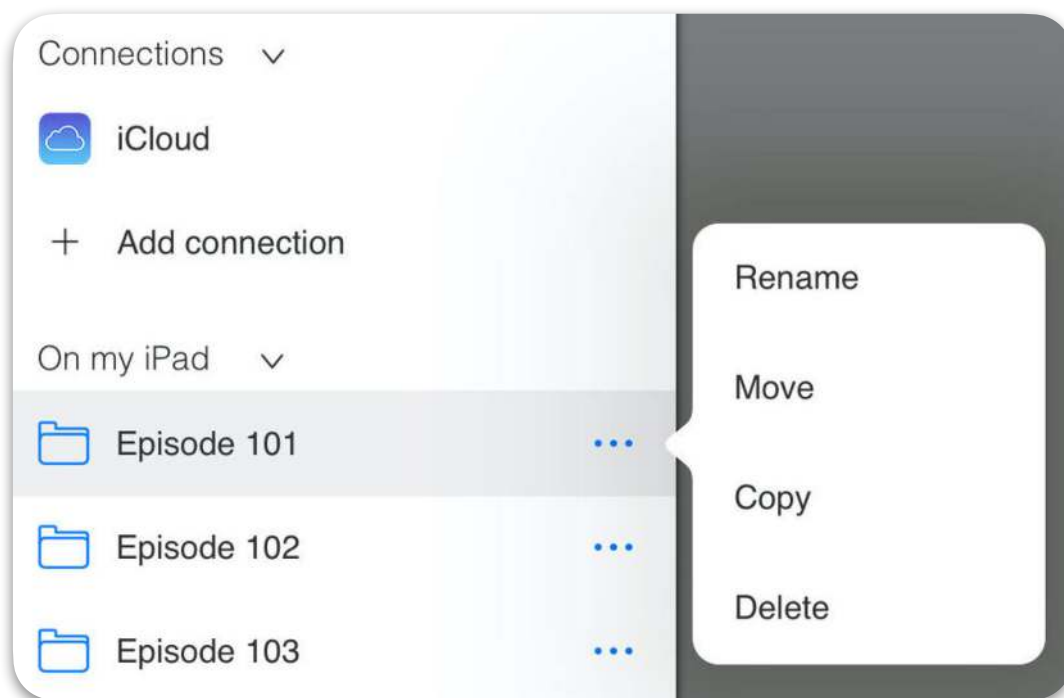

- 4 With Scriptation open, tap **iCloud**, and tap **Select**.

Moving local files into iCloud

Files that are stored On My iPad / iPhone are local to that device, and are not synced with iCloud.

To relocate files into iCloud, tap the  next to any file or folder, then select **Move** or **Copy**.

Move is limited to single files.

To relocate multiple files or folders, use **Copy**.

Working across devices

iCloud comes automatically connected with your device's Apple ID.

iPad or iPhone

Any files stored within the iCloud folder on one device will automatically sync to your other devices.

Connections ▾

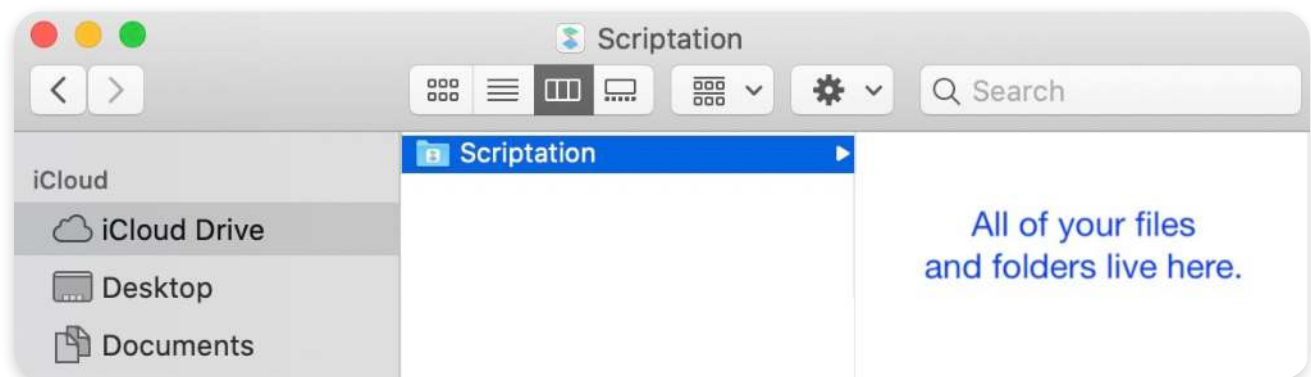

iCloud

Files not syncing?

From Apple Settings, verify the Apple IDs match on both devices.

Mac

Scriptation automatically generates a sub-folder inside iCloud Drive. It's only this sub-folder that sync to Scriptation on iPad or iPhone.

Enjoy!
