

Take a quick tour and discover the time-saving
power of going paperless.

Let's begin by importing files

Files can flow into Scriptation from many sources, but the most common is via email attachment.

- 1 Open the PDF
- 2 Tap **Share** 
- 3 Select **Scriptation**

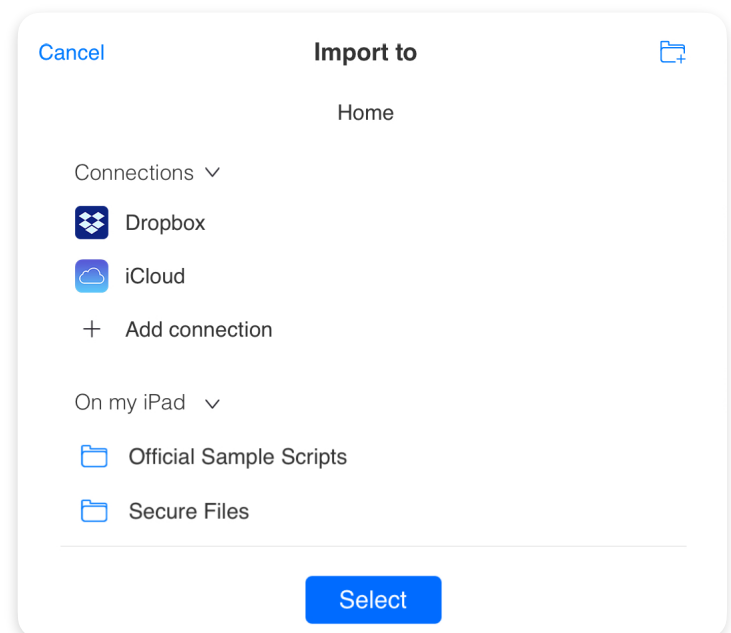

Tip: Don't see Scriptation? Swipe right and tap

- 4 With Scriptation open, choose a location to import to.

When you're ready, tap **Select**.

If you don't select a different folder, the default is "On my iPad."

Take notes creatively

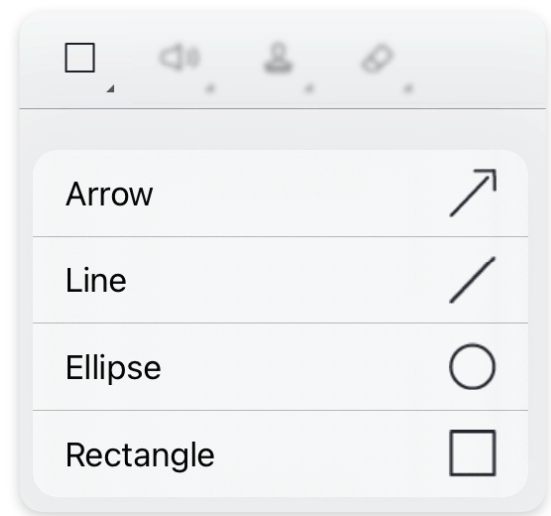

The Annotation Bar contains all of your note-taking tools.

Text Markup	{		Highlight
			Underline
			Squiggle
			Strikethrough
Text Creation	{		Text
			Sticky Note
Drawing	{		Drawing
			Freeform Highlight
Shapes	{		Arrow
			Line
			Ellipse
			Rectangle
Media + Presets	{		Image
			Audio
			Stamps
			Saved Annotations
Erasing + Selection	{		Eraser
			Selection
			Apple Pencil
			Undo
			Redo
			Close
			Move

Depending on screen orientation, some icons may be grouped.

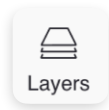

If a tool has an arrow in the corner, **tap and hold** to expand.

Saving is automatic.

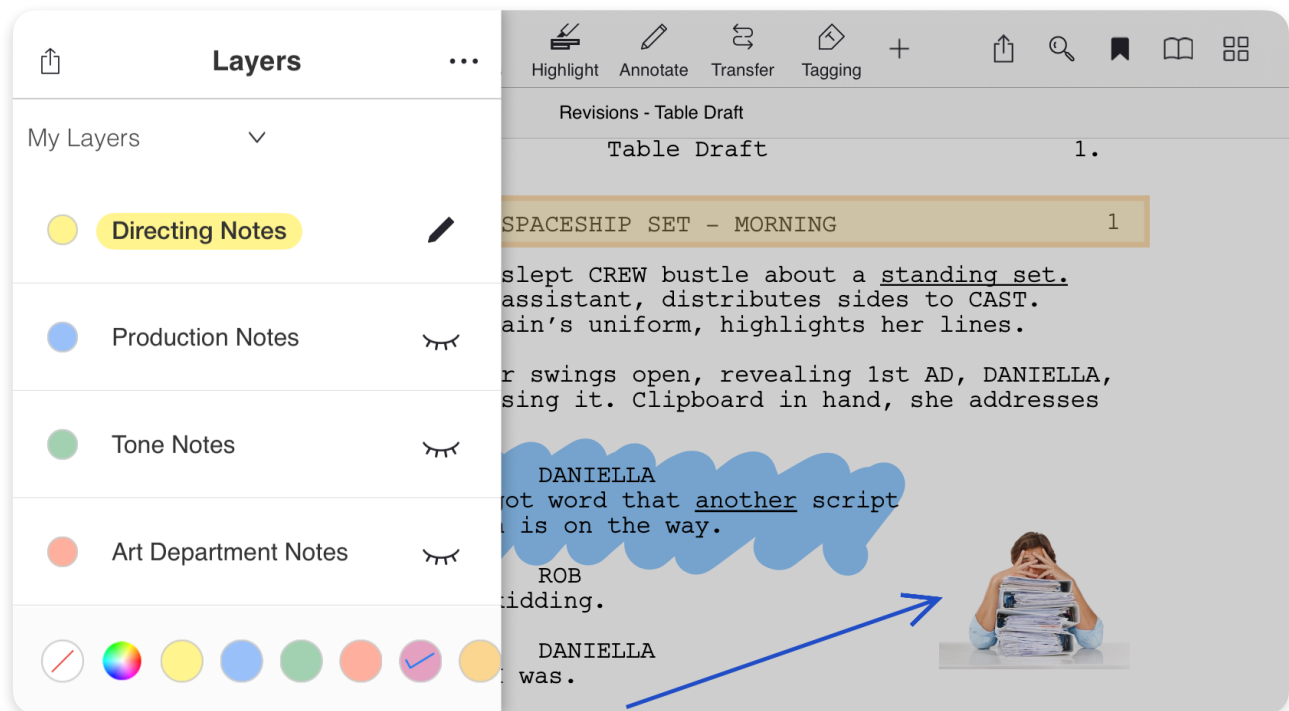

Your file is saved after every annotation is made.

Organize notes in Layers

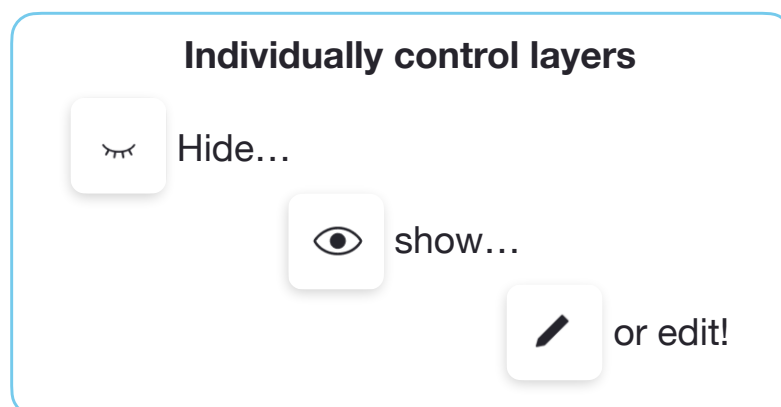

Work in three dimensions with Layers, organizing your notes into groups of annotations.

Every file begins with one layer, but it's easy to add and customize.

To add a new Layer: Tap **+ Add Layer**.

Easily manage pages

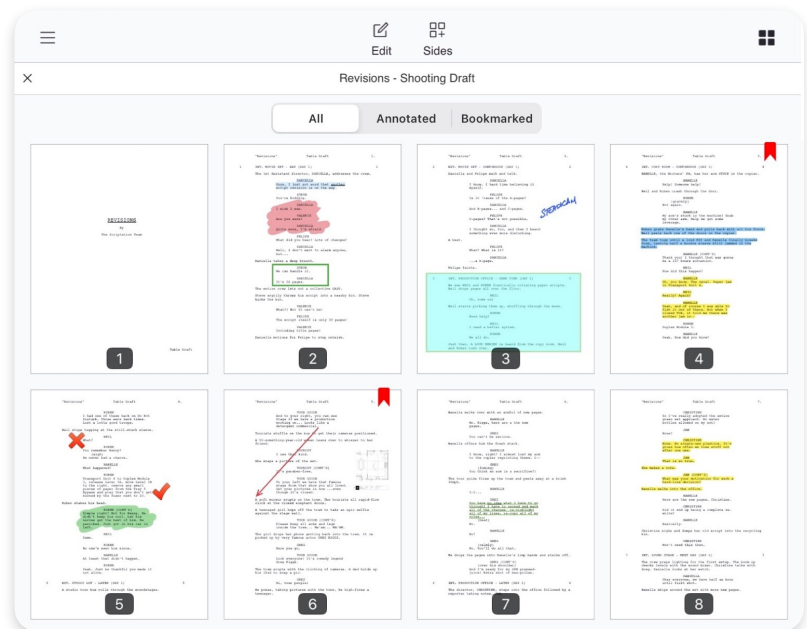

The Page Manager presents a birds-eye view of your

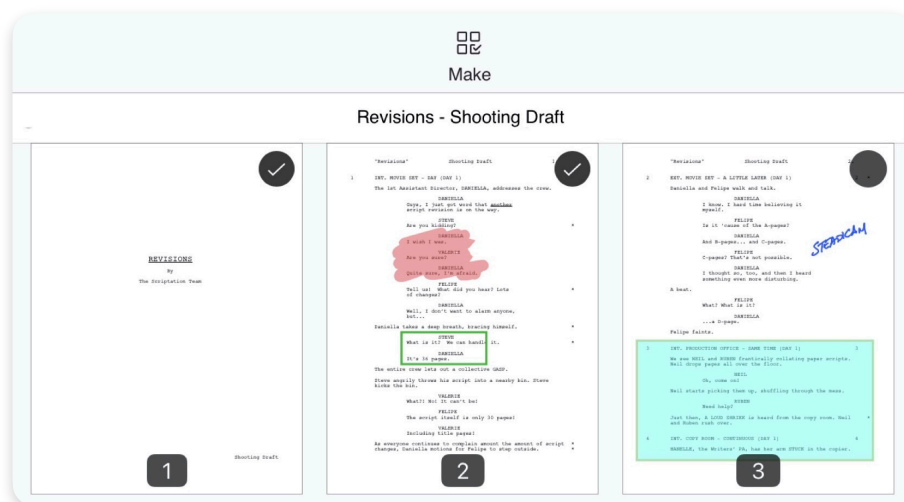

By tapping **Edit** you have the power to:

- 1 Add Custom Pages
- 2 Insert Facing Pages
- 3 Copy/Paste Pages

Tap + Drag rearranges your added pages.

By tapping **Sides** you can easily create a new file.

Save time with Auto-Highlight

Enjoy the simplicity of highlighting with the tap of a button.

Once a script is imported, Scriptation automatically scans your script and detects character names.

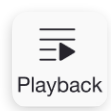

Then simply **toggle on** each character's lines.

Colors are customizable!

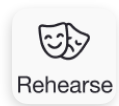

Tap a color dot to display other highlight options.

From first read to audition

Listen to scripts on the go with any device.

Rehearse with unique voices as your scene partners.

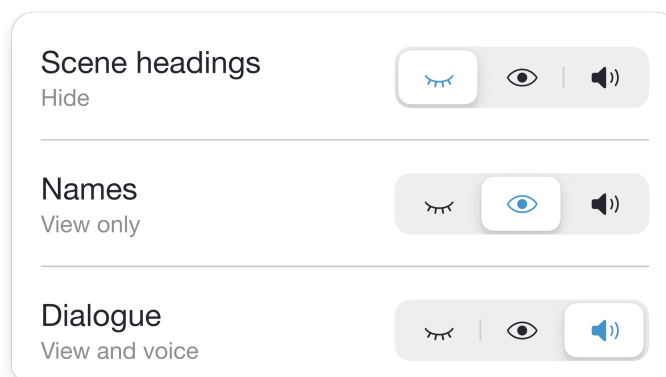

Record self-tape auditions to land the part.

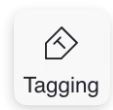

Pro Tip: Use Premium AI voices for the best experience!

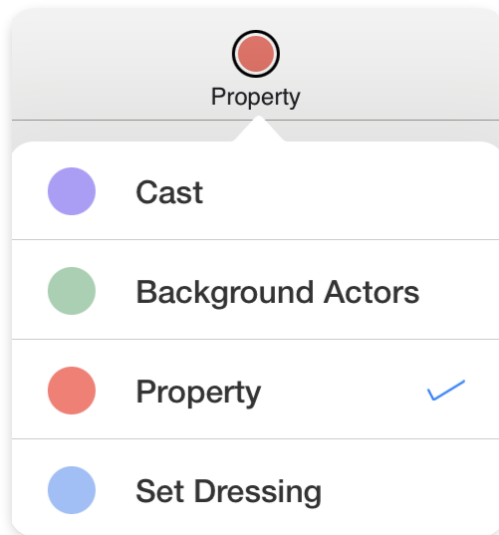

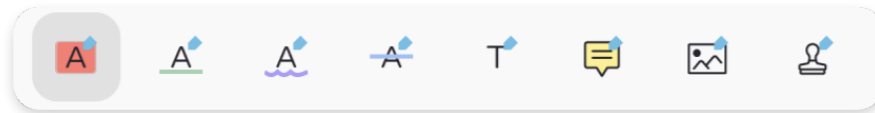

Tap Presets to choose which elements are shown and read aloud.

Tag elements and export reports

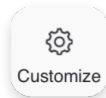

Break down your script with a variety of tagging tools, then generate reports to share with your team.

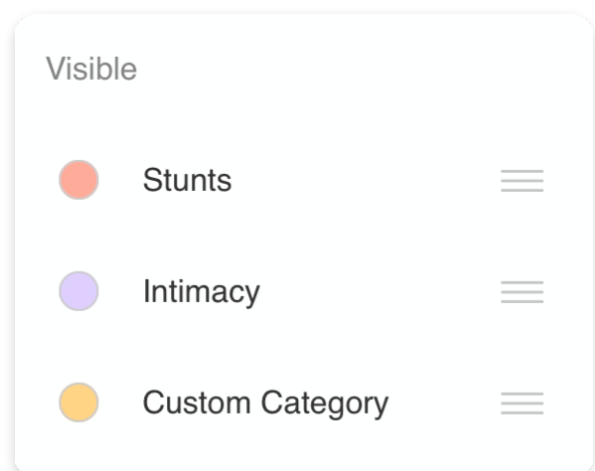

collate **paper scripts** next to the door, knocking into Paolo.

Tapping

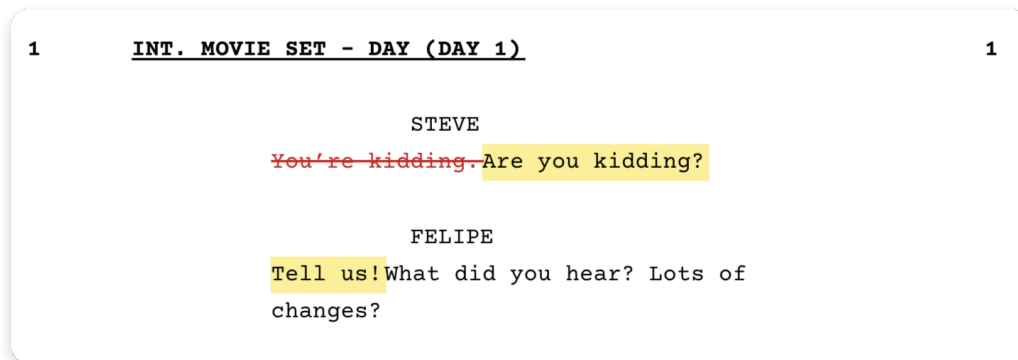

gives you the ability to:

- 1 Add custom categories
- 2 Change category colors
- 3 Edit the category list

See changes between revisions

Keep track of every change between two drafts of a PDF script.

Select **Compare Scripts** during Transfer

Short on time? See a concise summary of changes between scenes.

4 INT. COPY ROOM - CONTINUOUS (DAY 1) 4

In the first version, there is additional dialogue and action lines that add more backstory to the copier jam situation. Ruben talks about a previous job and a coworker named Benny who left after a similar incident. In the second version, the dialogue is trimmed down, and the backstory is simplified. The additional lines in the first version add a darker tone to the scene.

Select **Analyze** from the Top Toolbar

Transfer notes to the new draft

Just received a new script? It's time to transfer notes!

- 1 Open your **new** script, and tap

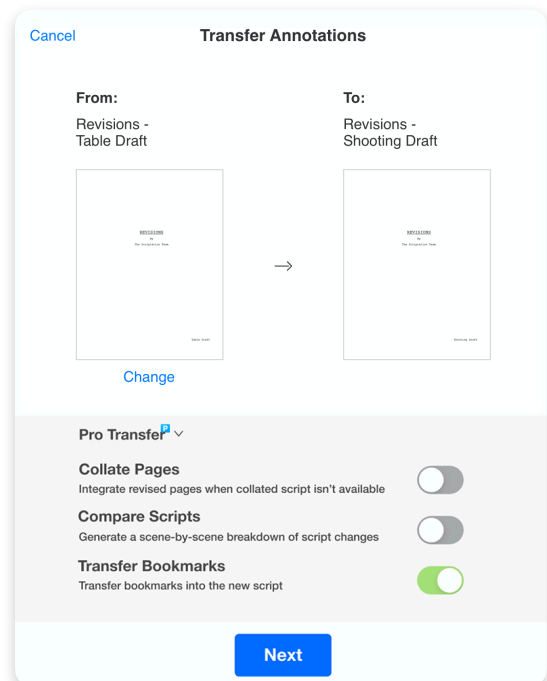

- 2 Select the **old** script. (The one with all of your notes.)

- 3 A dialogue box will confirm the transfer direction. Tap **Next**.

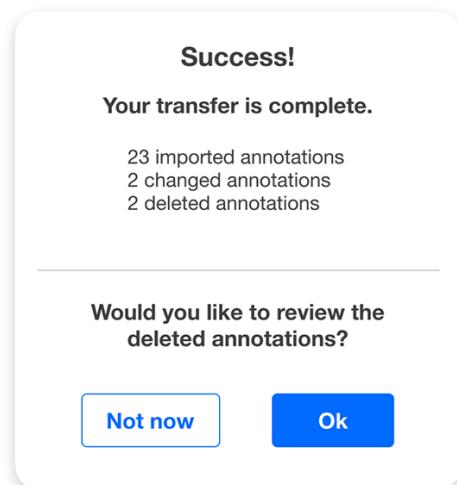

Industry Pro users can utilize additional features:

- Multi-Layer Transfer
- Compare Scripts
- Bookmark Transfer
- Collate Pages

- 4 An Import Summary will appear when complete.

All of your notes have been transferred!

There's more to explore

Share

Export notes to your team or email them to yourself with all of your file-sharing options in one place.

Bookmarks

Navigate through your script quickly with one-tap markers and easily return to a specific page or scene.

Search

Instantly analyze your script with keywords and phrases to find props, locations, or dialogue.

Cloud

Your access point for all cloud storage connections, including Dropbox, Google Drive, OneDrive, and iCloud.

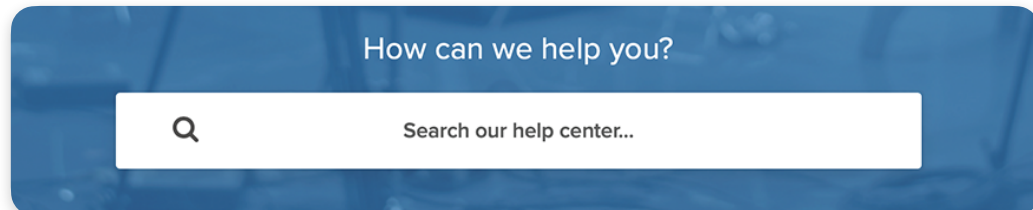

Outline

Search within a complete list of bookmarks and notes to view all of your annotations at a glance.
